

## Game Creek Video Hudson, New Hampshire

Project: (2) High Definition 53'  
Expando Trailers  
Project Value: \$15,000,000.00

### Special Points of Interest

- *Patriot and Yankee were Game Creek Video's first two HD production units.*
- *Each production trailer has more than 11,000 wires in the system, stretched end for end, long enough to go from San Francisco to San Jose.*

Game Creek Video provides quality production units to a wide range of broadcast and cable customers. Its fleet of nine production units is the most up-to-date in the industry and includes eight digital units of which two are straight side bodies and six are expandos.

Game Creek chose Diversified Systems to assist in engineering and integrating their trucks. The trucks were built at Diversified Systems' west coast Santa Clara, CA integra-

tion facility.

The two new trucks (Patriot and Yankee Clipper) are identical, although the requirements for their intended network destinations, ESPN and YES Network had quite different production requirements. Designing an infrastructure that was totally flexible allowed Game Creek to keep costs under control by using a single design and duplicating the installation.

Game Creek Video was founded in 1993 with a very simple concept - to provide its customers with top quality television production units, top quality support and coordination, and most importantly, the highest quality engineering.

Diversified Systems is proud to be affiliated with this mobile production company.
